

Our Approach

The JHC¹ Accelerator Academy is a didactic and activity-based learning curriculum with the goal to provide a learning environment in which participants can accelerate change for a defined topic/issue in the health equity, diversity, and inclusion space. Participants will learn how to use design thinking to solve an issue and walk away from the Academy with the beginning stages of an initiative planned and a community of support. The Academy is targeted for Diversity, Equity, and Inclusion teams and/or organizational development teams.

1. Just Health Collective

Kick-Off Meeting

Interactive day-long meeting with education on diversity and inclusion concepts
